A modern office reception area. On the left, a white reception desk with a dark wood base holds a laptop and a small potted plant. The wall behind the desk is made of light-colored stone tiles. The ceiling features a wooden slatted design with recessed lighting. In the background, a glass-walled office space is visible, with the name "Tillett & Gibbins" on the wall. The floor is made of large, light-colored marble tiles. On the right, a black leather sofa is partially visible.

A modern office interior featuring a long wooden table, black ergonomic chairs, and two large, cylindrical pendant lights. The ceiling is made of horizontal wooden slats, and the walls are a combination of wood paneling and frosted glass partitions. The floor is covered in a dark, patterned carpet.

A diagram of a horizontal beam of length 900 units. The beam is supported by two black rectangular blocks at its ends. A dimension line below the beam indicates the total length is 900. An arrow points to the right above the beam, indicating the direction of motion.

A diagram showing a quarter-circle arch. The arch is defined by a quarter-circle curve connecting two vertical lines. The horizontal distance between the base of these two vertical lines is labeled as 920. The vertical lines are represented by double lines, with the outer line being black and the inner line being white. The arch itself is a thin black curve. The overall shape is a quarter-circle with a radius of 920.

Technical drawing of a quarter-circle arch. The arch is defined by a quarter-circle curve with a radius of 900 units. The total width of the base is 1000 units, and the total height is 950 units. The base consists of a 50-unit wide section on the left and a 50-unit wide section on the right, with a 900-unit wide section in the middle. The height is composed of a 900-unit vertical section and a 50-unit horizontal section at the top. The drawing includes dimension lines and arrows indicating these measurements.

Technical drawing of a sliding door assembly. The drawing shows a vertical rectangular door with diagonal hatching, indicating it is made of 10mm thick tempered glass. The door is mounted on a sliding track at the top. The door handle is located on the left side. Dimensions are provided: the total height is 2600, the total width is 900, and the door width is 50. The door is labeled "SLIDING DOOR". The track is labeled "SLIDING TRACK". The door frame is labeled "ALUMINIUM BY ALLOY". The glass is labeled "10mm.THK. TEMPERED GLASS". The handle is labeled "DOOR HANDLE".

Technical drawing of a door assembly. The drawing shows a vertical door with a diagonal hatching pattern. The door is framed by an aluminium alloy. The glass is 10mm thick tempered glass. A door handle is shown on the left side. Dimensions are indicated: overall height is 2600, height of the glass panel is 1000, overall width is 920, and the width of the aluminium frame on each side is 25.

Labels and dimensions:

- 2600 (Overall height)
- 1000 (Glass panel height)
- 920 (Overall width)
- 25 (Aluminium frame width on each side)
- ALUMINIUM BY ALLOY
- 10mm.THK. TEMPERED GLASS
- DOOR HANDLE

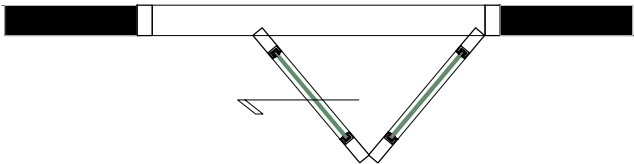

Technical drawing of a door assembly. The drawing shows a vertical door with a diagonal dashed line indicating a split or hinge line. The door is labeled with a triangle containing the text "LA2". The door is shown within a frame. Dimensions are provided for the door and the frame. The door height is 2600, and the door width is 900. The frame width is 1000, with 50 units on each side. The door handle is located at a height of 1000 from the bottom. The door is labeled "ALUMINIUM BY ALLOY" and "SOLID DOOR PANEL". The door handle is labeled "DOOR HANDLE".
